- Mohammad Younus Shaik

OBJECTIVE

Having an engineering foundation with my strong interest in **Computer Science and Engineering !**

- Motivated me to pursue diverse projects and Internships over the fields of web development and Data Scraping.
- My work experience and background have allowed me to be adaptable and enjoy learning new technical skills while demonstrating strong interpersonal skills
- I enjoy working in collaborative environments and building genuine relationships.

WORK EXPERIENCE

Kindbeings (Startup)

Full stack Web Developer

(April 2020 - June 2020)

- Designing ,Developing and working with remote MySQL Database Management.
- Working with Restful APIs

50hands (Canadian Non-Proift Organisation)

Technology Intern

(May 2020 - July 2020)

- Part of Data ETL team .
- Responsibilities is to scrap the COVID-19 data of India, Canada and USA using government APIs and working with remote MySQL database.

EDUCATION

Vellore Institute Of Technology, Amaravathi

B.TECH Computer Science and Engineering

(July 2017 - April 2021)

8.56

Sri Chaitanya Junior College

XII M.P.C

(June 2015 - April 2017)

97.7%

Sri Chaitanya High School

Secondary School

(June 2014 - April 2015)

9.7

PROJECTS

COVID 19 Data

https://github.com/shaikyounus/50Hands_Internship

May 2020

- Collect COVID -19 data from Json data and convert them to CSV.
- Load the CSV files into 50hands remote Mysql database.

Cloud Computing Project

<https://github.com/shaikyounus/Cloud-Computing-AWS-EC2-web-project-deploy>

June 2020

- Worked with AWS EC2 Instance, Putty and FileZilla
- Web project deployed on AWS cloud.

DonateKart

<https://github.com/shaikyounus/DonateKart>

May 2020

- Developed an online donation platform with PHP language.
- Worked with HTML, CSS and JavaScript.

Missing Person

<https://github.com/shaikyounus/Missing-Person-Php>

May 2020

- Developed Missing Person website helpful to identify missing person.
- Developed using HTML, CSS and JavaScript and PHP languages.

Android News App

<https://github.com/shaikyounus/Android-News-App>

May 2020

- An app which shows breaking news, headlines and search for articles from news sources and blogs all over the web with our news API.
- Developed using Java language.

Swarm Robotics

<https://github.com/shaikyounus/Swarm-Robotics>

March 2020

- Programmed two robots which communicate and coordinate among themselves and shown Master and Slave robot interaction.
- Developed with Microcontroller boards.

Voice To Visual

<https://github.com/shaikyounus/Voice-To-Visual>

October 2018

- Speech Recognition Using Microphone and displays the text on LCD screen display.
- Developed using Google speech Recognition API, integrated with Raspberry pi 3 board.

Web Scrapping

<https://github.com/shaikyounus/Python-WebScrap>

March 2020

- A Python project to scrap the Linkedin urls of specified Company employees in the goolge search query and send the data to gmail using Selenium and SMTP modules.
